Team of instructors

Name	Email	Role
Paulo Merson	pmerson@andrew.cmu.edu	Lecturer, mentor
Matthew Bass	mbass@andrew.cmu.edu	Lecturer, mentor
Mona Elsing	mona.elsing@gmail.com	Teaching assistant
Jason Popowski	jpopowsk@andrew.cmu.edu	Tech advisor for the project
Dan Plakosh	dplakosh@sei.cmu.edu	Tech advisor for the project
Stephen Beck	srbeck@sei.cmu.edu	Tech advisor for the project

pleased
TO MEET YOU

Paulo Merson — pmerson@cmu.edu

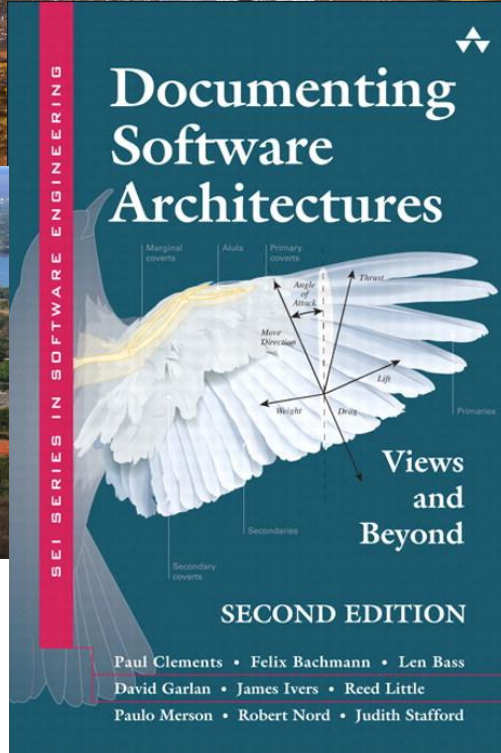

**Carnegie
Mellon
University**

UnB

Software and Societal
Systems Department

Carnegie Mellon.

Software Engineering Institute

“Rules of engagement”

- Your participation is important
 - Feel free to ask questions or add comments at any time
 - Discussion is good, but we might cut a discussion short in the interest of time
- We’ll start and finish on time 🙌
- If attending online 🖥
 - Just unmute your mic and speak up if you have a question or comment
 - You can use the chat too (but interaction there has eventual consistency)
 - Please mute your mic when not speaking
 - Do not watch classes on a cell phone because content won’t be readable

Hello world!

- What's your name?
- What LGE group do you work for?
- What's your technical background with software?
- What languages do you know?
- What do you expect from this training program?

Agenda

*Make sure to check your
Andrew email frequently*

Introductions

➔ Canvas, Piazza, syllabus

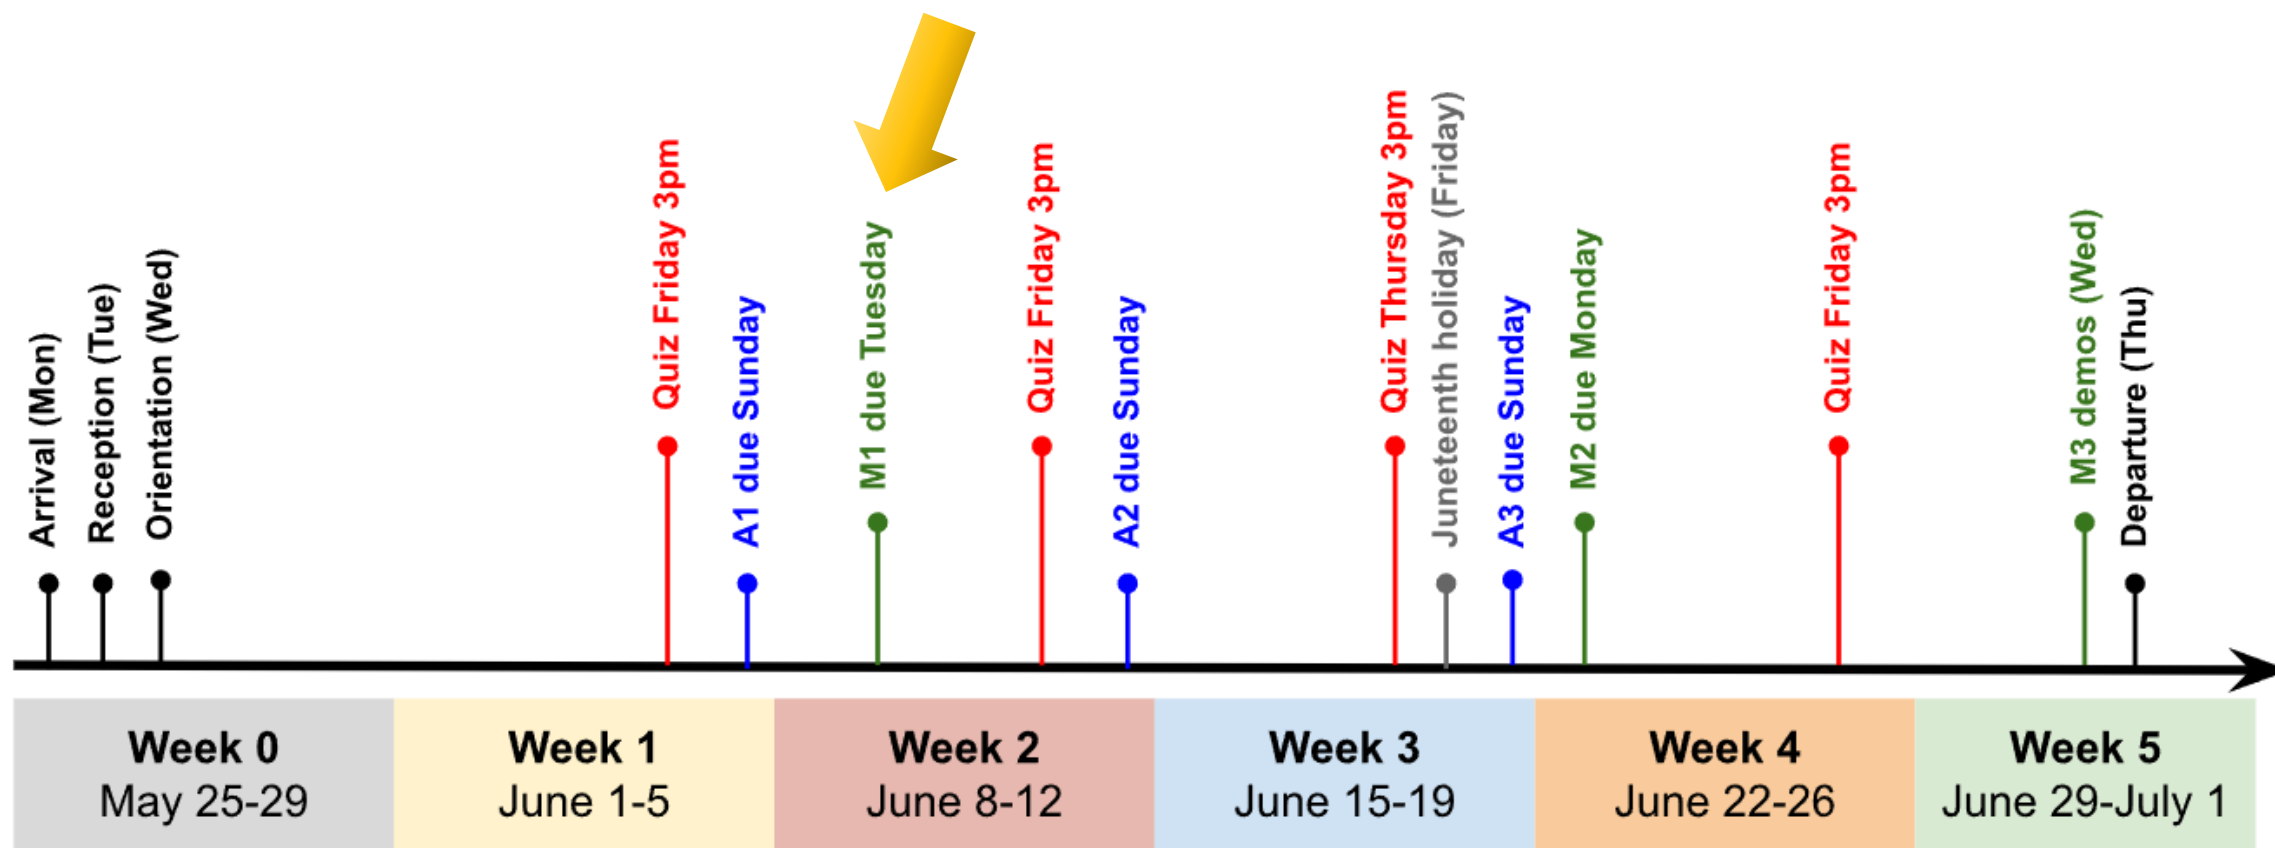

Quizzes, assignments, project

About the project

Template for experiments

Quizzes, assignments, project

And there are reading assignments each week

Agenda

Introductions

Canvas, Piazza, syllabus

Quizzes, assignments, project

➔ About the project

Template for experiments

First steps

- Watch Matt's video lecture about the project dynamics
- Read the project description document
- Follow the instructions for environment set up
- Schedule a weekly meeting with the team mentor
- For questions about the project specs and implementation:
 - Ask on Piazza
 - Schedule a meeting with Dan, Stephen or Jason

Tools for non-code artifacts

- You can choose the tools you are more comfortable with
- Examples:
 - Code repo: github, gitlab
 - Text editor: Google doc, Word, Markdown
 - Whiteboarding and diagrams: miro.com, mural.com, figma, diagrams.net (draw.io), Mermaid

What tools work better with AI?

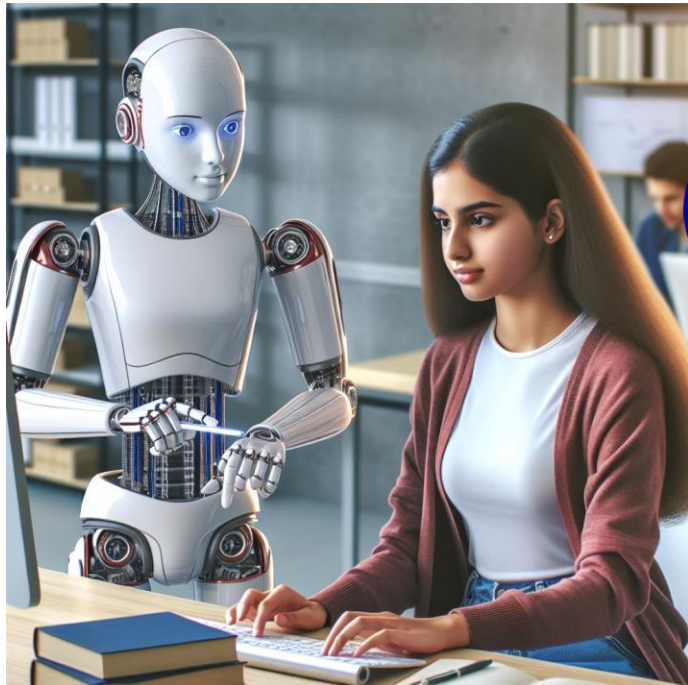

*Is it OK to
ask AI to
create things
for me in this
course?*

Use of AI

- To implement the project
- To revise docs and create slides

It's
OK

- In weekly quizzes
- In individual assignments

IT'S
NOT
OKAY.

About the project

➔ Technical experiments

Technical experiments

- Technical experiments (aka POC, prototype) can mitigate risks
- Use the template available here:
 - <https://github.com/pmerson/technical-experiment-template>
